

LSI Independent College

Accessibility Plan

- LSI Independent College is a small college. The average student number varies from 25 to 40 with a maximum capacity of 80 students.
- The building has four floors; basement, ground, first, and second. In case of a SEND student who needs special arrangements for accessing the stairs, the ground floor classrooms will be reserved for all her/his lessons.
- In addition to two classrooms, the ground floor comprises Reception, Director of Studies, Deputy Designated Safeguarding Lead, Career Advisor, Pastoral Tutor, student lunchroom and toilets (appropriate handles will be installed around the toilet).
- The art and science labs are on different floors. If the student takes these classes, all the necessary equipment will be provided in the ground floor classrooms.
- The ground floor has stairs from the main gate. A special wheelchair ramp will be arranged for using these stairs. The reception staff will be always available to provide any help during the access.
